Professional Experience

Deutsche Telekom IT GmbH

APR 2026 – PRESENT

Software Engineer

DARMSTADT

- ▶ Designing and developing robust backend services and microservices using Java and Spring Boot.
- ▶ Actively contributing to agile software development within a scaled LeSS framework (Large-Scale Scrum).
- ▶ Implementing and deploying REST APIs and integrating them into the existing system landscape.
- ▶ Ensuring code quality through automated testing and collaborative code reviews within the team.

Deutsche Telekom AG

AUG 2022 – MAR 2026

Dual Study Student in Computer Science

DARMSTADT

- ▶ Continuously contributing to development projects, including during periods between university theory phases.
- ▶ Expanding the backend unit test suite for MagentaTV to improve maintainability.
- ▶ Evaluating and introducing an end-to-end testing framework (Playwright); implementing automated E2E tests for a web portal, including tool selection and best practices.
- ▶ Working according to Scrum (sprint planning, reviews, retrospectives) and applying modern DevOps practices (CI/CD, containerization).

Education

Darmstadt University of Applied Sciences

AUG 2022 – MAR 2026

B.Sc. Computer Science – Dual Study Program

DARMSTADT

- ▶ Focus areas: Embedded Systems, Operating Systems, Compiler Construction
- ▶ Grade average: 2.2 (German grading scale)

Mainz University of Applied Sciences

OCT 2020 – MAR 2022

B.Sc. Applied Computer Science (No degree; transferred to Darmstadt)

MAINZ

- ▶ Coursework included IT Security, Web Technologies, Intelligent Information Systems
- ▶ Grade average: 2.0 (German grading scale)

Realschule Plus und Fachoberschule Mendig

AUG 2018 – JUL 2020

Advanced Technical College Entrance Qualification, specialization in Technical Computer Science

MENDIG

- ▶ Final grade: 2.1 (German grading scale)

Professional Development

Training for Mentoring and Supporting Early-Career Talent

DEUTSCHE TELEKOM (2026)

Focus: Mentoring & Teaching Methodology

- ▶ Methodological and pedagogical training for mentoring, onboarding, and supporting apprentices and dual study students in their professional development.

Projects & Awards

Personal Homelab (k3s)

ONGOING

- ▶ Operating a k3s cluster on personal hardware; deploying and operating containerized applications.

Compiler Development (University Project)

2025

- ▶ Developed a small compiler in C++ using Bison, Flex, and LLVM to translate a simple programming language into LLVM IR.
- ▶ Implemented lexical analysis, parsing, and code generation.

Hackathon Fulda 2024

OCT 2024

- ▶ 1st place and special award “Best Code” for developing an AI-powered knowledge platform using a microservice architecture.
- ▶ Developed a specialized PDF microservice with Python and FastAPI for extracting, processing, and indexing document content as the basis for AI-powered search queries (RAG).

Hackathon Fulda 2023

OCT 2023

- ▶ Developed a social media prototype on the topic of “sustainability” using SvelteKit, Node.js, and PostgreSQL.

Skills

Programming Languages	Python, TypeScript, Go, Java, C/C++
Frameworks & Backend	FastAPI, Node.js, SvelteKit, Deno (Fresh), Spring Boot
DevOps & Infrastructure	Kubernetes (k3s), Docker, FluxCD (GitOps), CI/CD, Helm
Databases & Storage	PostgreSQL, MongoDB, Redis
Testing & Quality	Playwright (E2E), Unit Testing (JUnit), Test Automation
Methods & Tools	Agile (Scrum, LeSS), Git, Linux (Server Administration)

Additional Information

Engagement	Tutoring fellow students; moderator of an online community
Driver's License	Class B
Languages	German (native), English (B2)
